SHORTIES SHORTIES SHORTIES SHORTIES SHORTIES SHORTIES SHORTIES SHORTIES

=====

How to identify the tracking stations: US Space missions are again very common (Columbia space shuttle) and so are the tracking stations when missions are "in the air". These land based tracking stations sometimes identify by names/PH at other times by a number as follows:

- 0 - Cape Canaveral Florida / NASA Merritt Island
- 1 - Cape / Patrick AFB Florida
- 2 - Jupiter Florida
- 3 - Grand Bahama Island
- 4 - Eleuthera Island Bahamas
- 5 - San Salvador Island Bahamas
- 7 - Grand Turk Island
- 12 - Ascension Island
- 13 - Pretoria South Africa
- 89 - Mahé Seychelles Islands
- 91 - Antigua Island

(AFB89)

(AM)

They have many more tracking stations e.g. 3 stations very close to Canberra in Australia and one just south of Christchurch New Zealand. The ones above are the ones known to be partly on HF. By the way the station in Carnarvon Western Australia is no longer a NASA tracking station but an OTC operated SATCOM station. Letter received April 3rd from Mahé says: "Since January 1st we are no longer on HF". Too bad !!!
2. previous Pftp 1/82 - Grand Turk and Grand Bahama (probably the same with the other stations on the Bahamas) are on cable to Antigua who can relay them to Ascension.

(CBj)

Zaire did it again: Zaire, not known to be the best debt payer around, have now really got into a big mess with their international telecommunications. Due to very large unpaid debts, PTT Brüssel simply closed down their HF links with Zaire recently.

New Stations in Sinai ?

About 450 men from the US 82nd Airborne Division landen mid-march on the Ofira Airbase in southern Sinai as the first participants in the new "multinational peace- and observation-force in Sinai". The peaceforce in Sinai consists of about 3000 men whereof 1250 are american personnel and the others come from the following countries:

Australia, Colombia, Fiji, France, Great Britain, Holland, New Zealand and Uruguay. The Eitam Airbase (close to Yamit on the Mediterranean shore) will probably be the HQ of the force and about 2000 of the men will be deployed here. The others, about 1000 men, will be posted at Etzion Airbase in eastern Sinai (almost on the shore of the most northern part of Gulf of Aqaba). Nothing has been said so far about any part of the force staying at Ofira Airbase.

We can probably expect Dutch, French and Fijian stations in Sinai and hope for stations at the Colombian, Uruguayan and British contingents. It is hard to guess if there will be any US MARS stations but we can always hope.

(CBj)

Michael Wendt: Nice to hear you have got RTTY equipment now so we can get contributions also for that section from you. We have not received to many contributions lately concerning RTTY.

Klaus Renz: Donnot worry about the very minor mistakes in your swedish
it just makes your letters more personal.
